Hi Is there anyone out there?? Or am I the only one.I wish there was more people into planners and ribbon typeloudspeakers! Please look at my postings and make a couple ofconments or your own set or tweeks you did. Which is better in thelong run with out getting listening futige if I spelled the right.Is A planner better or a ribbon? Please expian why? Also why do a lotof diyers mod.a lot of the ribbons that I see on a lot of diy web sites? Whats wrong with the driver in the first place? Why would youspend 500.00 each ribbon tweeter and then take it a part and mod it.I guess some people have money to burn! Also has any one worked with the b.g planners like the neo 8 or 3 sold at parts expess .com I was wondering if they sound like the maggies or not or what theysound like? PLease e-mail me to let me know or just repley. Havea great day. Thanks jm
