I bought an Eminence Legend 875 to replace the speaker in a practice amp I have and was really surprised. Guys this speaker is a great hifi speaker. I'm thinking of buying another one for an MK TQWP and I wanted to tell you all so you would think about doing it too. Use it with a 10k supertweeter. This is one sweet little speaker and I think people probably overlook it. It could be the next best kept secret in the hifi speaker biz.
