Subject: Theater 3pi ... difference with Thermionic 3pi?

To keep the size down, I think I'll try the Theater 3pi. I didn't want to drop down to the 1pi or 2pi given that these use the Motorola piezoelectric tweeter ... this is based on the assumption that the Eminence titanium tweeter is a higher quality driver. Also, what are the sound differences between the Thermionic and Theater systems? I notice that they use the Alpha and Delta Eminence woofers respectively.Thanks!
