OK - I am planning a DIY project with the following components. I would appreciate your comments and ideas concerning my selection. Do the components match?What about active vs passover crossovers?Would this configuration warrant a bi-amp approach?Any advice concerning speaker selection?PreAmp: Foreplay by Bottlehead http://www.bottlehead.com/et/adobespc/foreplay/foreplay_line_stage_kit.htmAmp: Paramour by Bottlehead http://www.bottlehead.com/et/adobespc/Paramour/paramour.htm or Zen Triode Select: https://athena.safe-order.net/decware/Select/select.htmSpeakers: Two Pi Tower
