Hi I just wanted you to know that I had a pair of mg 12's the newestver. I had a hard time running them. Do you have a buzzing noise orrattleing noise from the planner woofers? I just had a hard time setting them up. They are one of my fav. loudspeakers. Your mg-1's Iwould call magenpan and get some idea's on what to do your self. Iwould cost a lot for them to up grade the crossovers and the grillcloth. I would look at this new web site I found www.home.hetnet.n/geenius. or a.ka. humble-home made hi-fi do a googlesearch or yahoo or dogpile .com has all of them in it. This guy explains the croosover caps and how each sound and what they are goodfor. Just keep in mind we all hear diffrent like flavors of Ice creamsome like mint and some like super man. Please let me know how itturns out. Also look into replacing the wire from the speaker tothe cossover to the binding post. Look around. cardas is good for medal domes and planners and ribbons. You could also replace thebinding post to would not hurt. Well I hope this help and good luckwith your new project I hope it go's well. If you have any questionsfeel free to e-mail me. Thanks jm
