I've built kits and one project from a schematic. Yeah, I'm pretty freaked out right now, but as the saying goes "no guts, no glory." I just don't want to see a $75 trany go up in smoke. I'm going to ask lots of really basic questions (read as: dumb.) You can bet I'm going to get on everyone's nerves, but that's how I learn and why this is going to be so much fun. I'm really ready to order that peice of iron. Now we're one of the "big boys."".....ColinPS. Did you get your copy (2/05) of aX yet? I posted my thoughts over at the tube forum.....Colin
