Well my '06 Mustang gets 30-32 on the highway all the way up to 80mph. It gets a good 26mpg in town, unless I have my foot in it, then it gets 20. But it's so much fun to hit the gas!My motorcycle only gets 40-42 mpg if I keep it between 60-70. Any more than that and it drops quick. Gas for this puppy is where most of my extra $$$ goes to, especially in the summertime.
