Yes. I can help.

Attached is a list of every song that has made the Billboard hot 100 for the years 1946-2004, plus a minimal amount of stuff I have added.

There is some oldies and hip hop missing from the letters A-C because I am in the process of cutting this list down of stuff I know I will never want to hear and has no practical purpose. A handful of songs (from the likes of Boston, Journey, et al.) are missing because I have the albums, so I deleted the extra copy.

The few pop albums I have are there in their entirety as well, so you can assume Peter Cetera did not have every song he recorded make the list(s). There's also some dupicates because some of these MP3's are very old encodings and needed replacement:

Here is the list, warts and all:
