Thanks Wayne!The 1 pi's were a great academic excercise for me as an introduction to speaker building. I repositioned them with both on top of some seperate bookshelves. One is in a corner and the other is on its side against the wall. Even in this awkward position they sound better in the bass, probably because of the corner/wall loading. The local Classical station sounds pretty darn good.Thanks for your patience and generosity in sharing your knowledge.Eat Mo'Hot Sauce,crazychile
