I'm thinking one more JBL 2123 in a .5 cu ft box would make a damn fine center/dialogue spkr. I think they, in particular, are breaking in and blending better with the TADs. I'm going to hold off on torturing the xo for a while.Actually, 2123's for the rears might be nice, too.Silver E rears - yer killin' me. For ultimate refinement, they're still the ticket, IMHO. For kicking serious butt, well . . . .Glad you're digging the Conqueror! Keep your ears and your mind open.
