Hi everyone, I have too much stuff. So I will part with my back up TT to a good home at a fair $$. It is a Pro-ject Debut III with Speedbox and Acrylic Platter with larger counterweight. Includes both the original metal platter, OM5 and a Denon DL110. All are low miles and in perfect shape. I put jacks on the back of the TT to allow use of any cables. The originals aren't all that bad and I still have them. I have the packing box. Original cost of everything (all bought within the last 8 months) was just over $800. This was a tough call as my other TT is a Dual 701. With some mods to the 701 they are roughly equal in performance, the problem is the DB III can't use unshielded cartridges and for some music I prefer the sound of my Grado Reference Platinum I. It is unusable in the DB III. All for $500. Pick up is fine, otherwise I will add UPS insured.
