Here's a few pics I took on vacation last week. I have about 900 more to look through, LOL, so keep checking back if you're interested. A couple have been photoshopped a little (removing power lines, adjusting the brightness/saturation, etc...) but nothing that really changes them much from the original.Unfortunately, it was pretty cold the firt couple of days we arrived and the wildflowers dissappeared until the day we left, so no cool pictures of those. I will make a return trip just to take pics of the wildflowers.
