Acacia wrote on Thu, 22 July 2021 03:23I would love a surround sound system for gaming! Using those on shooting games would be a blast and perhaps more stressful, but I bet it'll be worth the experience. Is the system specific to a single function, or can it be used for both movies and gaming?
I bet that surround sound can work for both gaming and also for watching movies. The experience is special when you play shooting games such as Call of Duty or Battlefield games on the TV. Those are the types of games that always show how much of a good feature the surround sound is and why it is necessary for many homes.
