tower speakers? What do you think about a pair of the 7's for front channels and the 2pi's for the rear and center channels of a home theater setup? The room is about 16" X 24" with a sloped ceiling that varies between 8 and 12 ft. Up to about 20 people will occasionally be present at one time (superbowle and such), so I need to account for thier sound absorbtion too. Thanks much...
