Hi all,I have accomplished my summer goal, which was to create a website for AR (Acoustic Research) Turntables. With the help of many folks for info, and with the technical help of a long-time friend, it is officially unveiled TODAY!!www.vinylnirvana.comAs indicated on the opening page, this will be a website that will continue to grow. Please give me feedback as to what you like, and what you want to see more of. Please be kind, this is the first website for either of us. For those of you who have/manage other websites, if appropriate, I would appreciate a link. Of course I will reciprocate.Dave

Hi Good luck on the AR site. What do you know about retrofitting new bearings to the existing sub-chassis?

Thanks for your help. Keep you up to date I have inqiured about main bearings and evidently his method requires a press fit bearing shaft slightly larger to accomodate the wear in the bearing well. Sounds good to me and the price is very fair. I will continue to update as we progress. J.R.
