Hi Dean,I did a quick internet search, hoping to find photos of a manufacturing plant and the processes involved. I found two links that might be interesting:Warton MetalsCalifornia Lead Manufacture Medical GuidelinesWayne

They used to have a program called "Hot Dog," on TV. Joann Worley of "Laugh-In" fame was the hostess. They showed all sorts of manufacturing processes, such as how they put toothpaste into the tubes, how they make crayons, and others. It was a Saturday Noon kid program, but I ate it up; it was well-done and one of my all-time favorite programs along with Twilight Zone, Star Trek, etc.

Those shows were great!One of these days, I've gotta buy the "Laugh-In" series on DVD. Seems like I saw the collection advertised somewhere.
