Hi Wayne,

I'd like to request the plans for your 4Pi & 2Pi (tower) speakers. I can see in the shop I can get crossover boards from you. Do you sell the B&C DE250 also or only as part of a kit. How much is that please?

Thanks

Paul

I've sent the plans.

We do not sell raw drivers individually, only as a part of a kit. But we do sell crossovers by themselves for people that want to source the drivers locally.
