A friend of mine is leaving the country and selling his home theater system for a very low price. I have always admired it and he took good care of it, but I'm wary of buying second hand electrical stuff. What do you think?

I wouldn't buy anything electrical from someone I don't know if it's second hand, but you say this is a friend of yours and you saw how he treated his equipment. I would take it if I needed it, especially if the price is reasonable.
