I have a 2000 mitsu mirage with factory cd/cd changer control. do you know the pin-outs for the 13-pin round cd connector on the back of the head unit? Where could I get a mating connector to install an aftermarket cd player? Thanks!

You need a Scosche MI02 wiring harness. You can probably get it locally, otherwise check here.
Scosche MI02

The Scosche MI02 is a speaker adapter. I need to connect to 13 pin round din CD/CD Changer port on the back of the factory (Matsushita) receiver/CD controller. Any help with where to get the correct 13 pin din plug and/or the pin outs for this connector would be greatly appreciated.
