Hi im looking for any advice people can give on this. Ive tried your typical marshall 1960 type 4x12 cab and im sure I can find a cab with better cone control for heavy sounds. I play middle eastern music with small portions of maiden style pumping sections so I need quite a versatile cab but im most interested in getting a better tone than I am with the marshall cab. Ive also tried laney and line 6 cabs and thought they were terrible.Any thoughts?
