Hi,Still enjoying the Studio 2Pi in my living room. I am in the process of building a small, permanent, listenng room which is 12 ft. X 15 ft with a 10 ft dome ceiling with no windows (that's the biggest space I can haggle with my wife). I have just ordered the Paramours to go with the Foreplay in this room. Which Pi speakers would you suggest? I am leaning towards the Thermionic 3Pi or the Theater 4 or would you suggest the 2Pi and just add a subwoofer?Your input will be highly appreciated.Best Regards,Edwin

of these speakers work very well with Paramours.
