I'm in the market for some speakers to mate well with my bottlehead foreplay III/paramour combo...I'm limited in available space for the speakers and would like to be able to place them on a shelf or table...I listen to mainly jam-oriented music (GD, phish, wilco, etc.), some jazz and some acoustic stuff. I've been referred the Studio 2 speakers...Any thoughts?thanks for any help..Scott

Scott,If you haven't done so already, ask Wayne for the plans for the Studio series speakers and check them out. They are ideal with the Paramours- they give a full sound and very good bass response compared to some of the full-range single driver. If you look at the plans, you'll see they are much easier to build than some of the Fostex horn types.Matts
