I have an Idea for a threeway Top array cab , I can make a rough drawing and send it to you to execute it if you are at the deciding stage as yet

Right now, I'm pretty busy so things are moving at a crawl. But I'm always interested in audio, so please be sure and keep me posted. I think everyone around here is interested as well.

It's a very good looking design and I expect it would work very well.

That's a good idea. Rajeev's speaker looks like it would sound pretty nice. Maybe start a thread in the ProSpeakers forum and post the image files there too.
