Hi, A teaser photo of a remote control integrated amplifier. Can use KT77 or KT88 output tubes. Four inputs digitally selected with digital (precision resistor ladder) volume control. 80 db range with mute. A number of months out still. In prototype phase for testing. I may bring it to LSAF if I have room in the vehicle. No phono section in this one (yet )

Hi Everyone, I didn't like the color combo so here is a much more pleasing one at least to me.

Oh, yeah, man. That looks even better. The other look was good, but this one is great!
