For anyone looking for fun projects, check into Arduina programmable units. The most fun audio use I've seen is the laser harp in this YouTube video:

<http://youtu.be/sLVXmsbVwUs>

For more details, and more ideas, go to the site, MakeUseOf.com and look at their article:

<http://www.makeuseof.com/tag/arduino-technology-explained/>

and download their free beginner's manual:

http://www.makeuseof.com/pages/getting-started-with-arduino-a-beginners-guide?utm_campaign=newsletter&utm_source=2012-08-07

I'm not connected to MakeUseOf in any way, but I highly recommend them for almost any technology question.

Yes, the Arduino is cool. Or if you really want to go off the reservation, just get an Atmel processor and program it all by itself...
