I have built a pair of B380 subs and wanted to convert to Four Pi. The Four Pi drivers and crossover are not tested for the B380 cabinets, so I would like to build a pair of Four Pi exactly to spec with all components. May I have the plans for the cabinets please? Wood and tool are poised and ready. Many thanks for a quality, well-tested, popular product

And I thank you. \$400 gets me drivers, horn and crossover, correct? That, of course, is per channel.

That's right, exactly.

That's right, exactly.

Dear Wayne! Can you send me the plans of 4PI. I have a pair of these speakers with JBL2226H-s and B&C DE250, but my HDD ruined, and my all files deleted.
Thanks for help!

Istvan Fekete from Hungary
