Retails for \$3,200 each. Sacrificing them @ \$700 each.

These are like the LAB horn (same drivers) but slightly wider boxes (2.5 feet if i remember correctly) with a push / pull driver configuration and metal plates as heat sinks. Supposed to handle higher RMS wattages, but I've never pushed them super hard.

I have 2 of these and would just like to sell them. Drivers alone are worth \$700. I'd honestly be willing to sell for \$1,400 for the pair or best offer. Seriously, send me an offer and as long as it's better than the value of the drivers I'll consider it. Really good sounding subwoofers, but we never use them anymore.

Specifications:

Operating Frequency Range 30 Hz - 150 Hz

Sensitivity (2.83v/M) 110 dB

(1W/M) 107 dB

Maximum Output ( Continuous dB SPL @ 1M ) 137 dB

( Peak dB SPL @ 1M ) 140 dB

Input Power ( Continuous RMS ) 1600 watts

( Program Power ) 2400 watts

External Dimensions 45"h x 45"d x 28"w

Weight 285 lbs

Input Connector (2x) NL4MP
