I started using bandcamp.com a year or so ago to sell beats, but it's also a great platform to discover new artists. Has anyone here tried it? Share some of the great tunes you've found. Right now I'm digging <https://rappersiknow.bandcamp.com/album/prayerhandsemoji>

I don't think I've used or even heard of that site before, but I just gave it a look and the site appears to be a good resource for finding music outside the big labels. I'll have to hunt around and see what turns up. Thanks!

This is definately an alternative site. I put the name in of my favorite artist, and it showed me parodies, covers and instrumentals of that artist. He still puts out new stuff, but he has been mainstream for so long that I don't think a site like wants his new stuff.
