Due to reckless use of 'Post' button.So, how do we reconcile these discontinuous virtual realities in our rigs?Again, I've been working on this for a long time.Make your rig with the widest bandwidth, the lease phase shift (least number of reactive[capacitive or inductive] components), the lowest net impedence possible. I have just listed my reference recordings, and reference criterea baldly. I cannot tell you how many times I have been disappointed in the results. The sound does not have to improve for the experiment to be a success. Repeat this.Poinz
