I have several gainclones , two PP tube amps(never owned a SET), and several Marantz 2230 and 2238 amps. Still like the battery P/S NIGC the best, although a two way system using a SE sand amp for a full range and a GC for low HZ 15" low Qts driver which is rolled off at 150-180 Hz , both in sealed cabs is in the works. Otherwise just BLHs GC driven appears to give the best bang for the buck.ron
