Subject: Re: Do I need a high powered SS when a GC might do? Posted by roncla on Thu, 10 Feb 2005 03:32:02 GMT View Forum Message <> Reply to Message

I have several gainclones, two PP tube amps(never owned a SET), and several Marantz 2230 and 2238 amps. Still like the battery P/S NIGC the best, although a two way system using a SE sand amp for a full range and a GC for low HZ 15" low Qts driver which is rolled off at 150-180 Hz, both in sealed cabs is in the works. Otherwise just BLHs GC driven appears to give the best bang for the buck.ron
