Hello,The amp I'm talking about is at the followingURL.
http://www.passdiy.com/pdf/ZV8_power_jfet.pdfHe is also selling the Firstwatt F3, whichI understand is a much fancier implementation.This ZV8 (the one in the Audioexpress article) isso much like a tube amp that it would be easy toexplore lots of configurations that I can understandbecause I have been paying more attention to tubebasics.Skip
