I've had my Paraglows for about 3 years now. An Ear 834L & 834P are used as preamps, although I need the EAR MC3 step-up to get things really going! Thank's ever so much to Terry Cain for the great and very affordable "Abby". They've been an absolute treat!! listen primarily to analogue with my tube system.Good Morning all from the West Coast, Tom B.
