I've had my Paraglows for about 3 years now. An Ear 834L & 834P are used as preamps, although I need the EAR MC3 step-up to get things really going! Thank's ever so much to Terry Cain for the great and very affordable "Abby". They've been an absolute treat!! I listen primarily to analogue with my tube system. Good Morning all from the West Coast, Tom B.
