Hi Manualblock, If my memory serves me correctly, I believe that this is basically the same circuit as the VTV KT-88 amplifier, it has been a while since I have seen it, my memory is short. Would you please guide me to the VTV schematic on line if possible, so I can compare the two circuits? I have a pair of the Allen amplifiers and want to see if the VTV circuit would give me any pointers in upgrading what I have. Thanks Norris Wilson
