STOP IT!!! You're killing me with all this talk of t-amps sounding as good or better than tube amps. Do you realize how much money I've spent in the search of AUDIO NIRVANA, only to tell me I've been looking for the wrong plateau. Off with your head Seriously though, you really have me curious about the future of tubes vs. solid state. Why do I listen to tubes? Is it out of nostalgia? Is there a mysterious, yet unmeasurable psycho-acoustic force that draws me in? Time to go meditate over a hot pot of solder and look for answers in the swirls of the toxic eutectic.....Colin
