"Yeah, but do the AN caps SOUND better? IF so, they may be worth paying for?"
-akhilesh"Certainly! Unbiased listening tests among a random sampling of conceited, golden-eared audio snobs confirmed that the Audio Note caps beat the Jensens hands down. Independent laboratory testing has also proven that the shape and form of the Audio Note logo printed on the cap is 233% more effective at focusing supernatural interstellar cosmic audio karma into the cap than the Jensen logo.
