Hi Ron, Have you had the opportunity to hear the Yamamoto DC 300B and 45 SET amplifiers? If so, could you give us a comparison between your 45 SET and the DC heated models by Yamamoto? And finally, what would you consider to be a good horn three or four way system that has the mid-bass through treble drivers horn loaded and uses a quality bass reflex or better sub-bass design? Price no object to a realistically priced system that can be bought on the used market for the cheapskates and poor audiophiles. I am looking forward to your reply. Thanks Norris Wilson
