Hello, I have a couple M500's that need some help. I'm interested in replacing and upgrading the caps, resistors etc... I'm wondering if anyone knows if there is a kit for this purpose? Or do I need to get the values from the components themselves and simply locate better ones.Can someone tell me what some good replacement tubes might be for the rectifier?Is there any chance of me finding a schematic for this amp since from what I understand it comes in kit form? Thanks for your help. Petepeterswartz@earthlink.net
