Hi everyone,I own a Denon DP-25F turntable, bought it about 6 years ago, and after not having used it for a while, I pulled it out of storage to find the belt has fallen off. There are no instructions in the manual regarding how to put it back on; none of the newer models at their website show anything in THEIR manuals; and a search of local audio shops didn't find anyone who knew how to fix it either. Anybody here have any idea how to do it? Or where I might find info about it?Thanks in advance for any help.
