Cool deal! I just bought vinyl copies of "Nazz" and "Nazz Nazz", which are recordings of a band that Todd Rundgren was in before he started doing solo stuff. I had everything Rundgren did on vinyl except those early pressings, and I always wanted them. Found good copies last week so now I've added them to my collection!Seems like a lot of records are falling into the hands of a generation that doesn't want them or doesn't know what they are. I saw scads of Moody Blues records for sale too. Maybe it's seasonal - Time to buy!
