One disc of the 4 Symph's is slightly warped which the SME has no trouble with and one disc of the Turandot has a significant scratch on one side. That's it. A few ticks and pops.Puritani, Forza Del Destino and Tosca look as tho' they've never been played and all the covers are in great shape. Those little plastic discs with their tiny little graphics will be played for decades too but who delights in holding them in your hands the way we do LP's?
