coming along fine, I've put about every mod available on it. I just received the new sub chassis, but had it cut for the Morch tonearm, so I will have to find one of these now. it was the arm that Merrill originally recommended for this application. I may just have Anthony whip up another sub chassis for the black widow, which has an SME mount.Shortly, a new pully will be available, and I need to decide what to do for a speed controller. anyone contemplating these mods can be assured they are everything and more than i expected.Regards,Russellc
