Well, it seems that Technics SL 1200 is the best choice, but is there any difference between MK2/MK2PK, M5G and 1200MK5/1210MK5 versions, in terms of sound quality? I was able to find those online; the specs are nearly the same, but that does not speak of quality. Also, do you know what kind of cartridge is standard on Technics SL 1200 and what is its value? "CD is if you listen to music; while vinyl is if you love music." – absolutely true! Thanks!
