Hello.I recently found my old Micro DD-1 which had been lurking in the dark of my storeroom for many a year only to see that someone has put a stack of books ontop of it and by doing so cracked the cover and broken the needle.Being the novice I am I come to you for help, what on earth can I do?1. Is it possible to buy a needle for an old turntable like mine?2. Is it better to replace some parts of the table?I really have no clue.Please help.R.Thor.
