Subject: How important is a pre-amp if your amp has volume pots?

I've got my Dads old Thorens TD-124/SME, w/Sumiko EVO-III / NAD PP2 phono-pre and then patched directly into Dad's old serviced 1962 Fisher SA-300B tube amp, with built in volume pots, to my B&W 803's. Where should I begin to make an improvement as I've recently realized that both my systems should sound better. Thanks, Pete
