He had that rig and played Sousa marches for his one-night stands to get'm up and out. Kinda mis-cast as a lady-killer?The Rabco had a rep as being finicky and a poor tracker. Maybe undeserved, I see they're bringing \$\$\$ on Audiogon these days.Linn's and my Ariston, any suspended table really, are hobbies in themselves but the effort pays off.The VPI HW-19 Mk III or IV which moved the springs from the platter to the feet has to be the most under-rated table out there. Lot's of'm with good arms for around \$1,000 or less.No longer made but parts are. The opposite of "fussy".
