Back in the day, Gerrard was THE turntable to have. In my opinion anyway. Years ago, I had an old compact system that had a Gerrard turntable. The setup was as I recall, a solid state system, that had the turntable built in. To be honest, this was so long ago I don;t recall the specs and serial numbers. I do rememberer that the sounds that came out of that system were sweet. I know, this all probably dates me! So be it!
