Great score! About 30 years ago my fathers' uncle died, and I went with him to clean out his uncles house. There were over 300 78's. I relize there are not too many people that would be interested in these now, but the interesting part of this story is that several of the albums were of a young singer who was recording with the Tommy James and Glenn Miller Bands in the early 40's. He name was Doris Kepplehoff. Some here may remember her as Doris Day.
