So I have the Pioneer Series 20 PLC-590 and Fair Play mat with the Grace 704 Tonearm and the Grado Gold Cartridge and I just don't use it as much as it deserves. I'm just not expanding my vinyl collection anymore for a host of reasons. So, I'm looking for some guidance as to the fair market value. I've done a fair amount of searching but these items just don't come up for sale very often. I'd give the turntable a 7-8 for condition but the others a 9+. I'll appreciate any good feedback. Thank you!!
